**Material:**

Powder-coating steel frame

Features:

Hardpressed, rustproof, elegant appearance

**Density:**

850g/sqm fully opaque PVC fabric

950g/sqm transparent PVC fabric

Material:

PVC coated polyester fabric

Features:

Waterproof, UV resistant, fire retardant

DIN4102, B1, M2 / NFPA701

**Features:**

100% Waterproof, rust-resistance

Dual-track design

Our exclusive dual-track design helps the curtain slide effortlessly.

**Features:**

- Radiation heat reflection coefficient: up to 85%;

- Moisture-proof

- Size: H2100 * W900mm

- Frame: T6063-T5 **aluminum frame**

- Panel: 5 + 9A +5mm **insulating glass**;
one side frosted

The cap vent comes with a triangle PVC fabric cover or "hat" which allows both air circulation and rain protection.

The Solar Extractor Fan ventilation system offers a low-impact sustainable cooling system to extract warm air from top of dome.

ø500mm

Openable Glass Window is fabricated with an aluminum alloy frame and tempered glass. The position is customizable and the hole is factory cut.

For ø6 inch stove pipe

The stove jack hole position and size can be customized based upon your needs and factory cut, preserving the integrity of the steel frame, PVC outer shell and interior insulation fabric.

Two-layer Roll-up Ventilation Window offers a roll-up strapable PVC fabric exterior and heavy duty fly screen interior.

Panoramic bay window is fixed, optional in skylight or 2 transparent round windows.

The high-density mosquito mesh Magnetic Screen Door keeps insects out of your dome. The screen automatically opens and closes offering hands-free entry and exit for both you and your pets.
